

SCOPE: Traffic Camera Browser

User (Primary)

Developer/Admin (Secondary)

Register Account

Watch Live Traffic Camera

Watch Past Playback
(last 72 hours)

Add Camera to Favorites

View Browsing History

Manage Cameras
(Add / Remove)

Users can find a registration/login button in the corner of the page. Users can register an account to save cameras to their favorites and view their browsing history.

The platform displays a map showing the location of each camera. Users can watch videos by clicking on the corresponding camera.

When a user clicks on a camera, a list will appear in the user interface. Users can view the playback of any camera from the past 72 hours through our platform.

After logging in, a favorites list button will appear on the user interface. Users can add or remove cameras from their favorites list.

After logging in, a browsing history button will appear on the user interface. Users can view or clear their browsing history.

After logging in, an administrator list will appear on the user interface for administrators. Administrators can manage the cameras displayed on the platform through this list.

Users can watch videos captured by traffic cameras. Additionally, users with a personal account can view their browsing history. They can also add their favorite cameras to their favorites list, allowing them to easily find and watch the cameras they are interested in on the platform.

Administrators can gain access to the management platform by logging in with an administrator account. Administrators can manage the platform, such as adding and removing cameras displayed on the platform.
